Certifications: SAP – Foundations of Business Analysis; Intuit – Bookkeeping Basics & Financial Statement Analysis; Microsoft – Power BI & Data Analysis with Excel; Coursera – Python for Data Visualization; IBM – Generative AI Applications; DataCamp – Business Data in SQL

PROFESSIONAL EXPERIENCE

Senior Executive – Accounts, Finance & MIS

January 2022 – January 2025

Square Fashions Limited

Dhaka, Bangladesh

- Operated SAP S/4HANA for end-to-end financial transaction processing, including general and adjusting journal entries, and generated financial statements (Income Statement, Balance Sheet).
- Developed interactive Power BI dashboards for sales vs. target tracking and Accounts Receivable aging analysis, improving visibility into collection performance.
- Conducted job costing, profitability analysis, overhead cost analysis, and cash flow analysis, optimizing contribution margin by 12% through data-driven pricing and cost control strategies.
- Supported SAP S/4HANA ERP implementation by facilitating team training on system workflows, increasing team productivity and process efficiency by 20%.

Senior Executive – Accounts & Finance

November 2018 – December 2021

Al-Madina Pharmaceuticals Limited

Dhaka, Bangladesh

- Prepared and analyzed monthly sales performance reports, bank reconciliations, collection reports, and vendor management summaries, delivering financial reports to support senior management decisions.
- Performed operational overhead variance analysis using Power Query and Excel Solver, reducing operational costs by 10% through process optimization.
- Conducted physical inventory audits and stock aging analysis, reducing stock discrepancies by 15% and strengthening inventory control accuracy.

Executive – Accounts & Audit

January 2016 – October 2018

Novo Healthcare & Pharma Limited

Dhaka, Bangladesh

- Managed full-cycle Accounts Receivable and Accounts Payable processes in QuickBooks, including journal entries, payment processing, bank reconciliation, and vendor/creditor reconciliations.
- Developed integrated sales and collection reports for depot accounting using Advanced Excel, redesigned the receivables aging system, and improved collections tracking efficiency by 10%.
- Participated in semi-annual internal audits alongside the audit team, verifying accuracy of financial reports, reconciliations, and compliance with internal controls.

ACADEMIC PROJECT EXPERIENCE

Course: Business Analytics with R

Jan 2025 – May 2025

Predicting Credit Card Fraud

- Built and compared three ML classification models (Logistic Regression, Decision Tree, k-NN) in R on a dataset of 284,807 transactions, achieving 97%+ accuracy using SMOTE for class imbalance and ROC/AUC for model evaluation.
- Identified that 0.5 percent of fraudulent transactions clustered around low-dollar amounts during late-night hours in online and point-of-sale retail channels, informing actionable real-time fraud alert thresholds.
- Tools: R (caret, ggplot2, dplyr, ROSE), SMOTE, CRISP-DM methodology.
